

Get Your Point Across

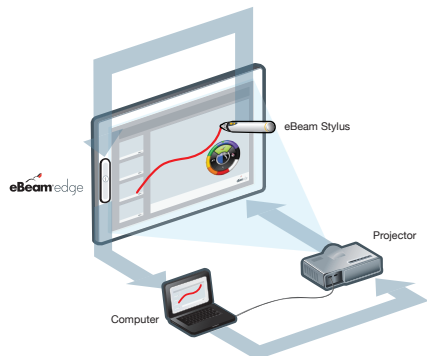

The big ideas that drive business happen in real time, but even the most monumental thoughts can be lost if they aren't communicated effectively and captured as they happen.

eBeam Edge for Business is the premier corporate interactive whiteboard, allowing businesses to cultivate a world of ideas that drive success anytime, anywhere, and from anyone. Unlike conferencing solutions, which are limited in their two-way interaction, eBeam Edge gives any business the ability to effectively collaborate, efficiently capture, and clearly communicate big ideas in person, over the web, or anywhere in between—in real time.

The included eBeam Workspace™ software provides an intuitive user interface and tight integration with many of today's most familiar business software applications to ensure that eBeam Edge can be used by virtually anyone who walks into a conference room.

The combination of a simple hardware setup and streamlined software eliminates the hassle from starting a meeting and keeps the focus on what matters: what's happening in the meeting.

Highlights

- Turn any surface into a collaborative workspace
- Bring your presentations to life by annotating in PowerPoint on-the-fly
- Collaborate with colleagues across the web using free and secure meeting sharing
- Create multi-page brainstorm sessions that can be saved or resumed at any time
- Manipulate whiteboard content by moving and resizing your drawings and imported images
- Markup any content on your computer: Office documents, webpages, images, and more
- Innovative and easy-to-use interface
- Easy and flexible installation
- Ultra-responsive sensor for realistic writing and drawing experience
- Measures less than 8 inches
