

Love the portability and flexibility of eBeam Projection? Well, it just got better. Introducing the new eBeam Projection Pro which includes two Interactive Styli, eBeam LiveWire, Interact DS, an Extended Warranty, and new and improved Handwriting Recognition software.

Two Interactive Styli

One for you and a friend! Teachers can keep a pen in their pocket while kids can use the “board pen” that never strays from the chalk tray or tag team annotating a PowerPoint Presentation without having to pass the stylus back and forth between presenters.

eBeam LiveWire

The brand new auto-run eBeam software cable means that you no longer have to scramble around to find the administrator password to install the software – just plug LiveWire on to the end of your eBeam’s USB connection and run the software straight from the cable. Great for classrooms or conference rooms where the eBeam stays put, but the computer changes with each teacher or presenter.

Interact DS

For times when you don’t have a projector or an eBeam handy, Interact DS unlocks all the powerful features of the Interact software right on your PC. Use the Interact tool palettes to create dynamic presentations at home or even use the software on your LCD or Plasma touch screen.

Extended Warranty

Protect your eBeam for a total of three years and enjoy the peace of mind knowing that you are covered for any unexpected repair or replacement of your receiver and/or stylus, even if there’s physical damage to it!

New Handwriting Recognition

Featuring MyScript Stylus from Vision Objects, our new HWR software understands over 15 languages and can transform either printed or cursive writing. Use it in any application that needs text input!
