

MULTI-SURFACE INTERACTIVE SYSTEM

MULTI-SURFACE INTERACTIVE SYSTEM

PolyVision's new Multi-Surface Interactive System (MSIS) is a unique combination of static, active, and interactive solutions that combine a Webster™ Touch Sensitive (TS) Interactive Whiteboard; horizontal sliders; and marker, chalk, or tackboards in one unit.

The Webster TS is simple to use and allows participants to listen and collaborate without having to take notes. When connected to a PC or Macintosh computer,

the Webster TS instantly captures everything written or drawn on its surface.

Reversible horizontal sliding boards provide flexibility, enabling use of several different surfaces at one time.

Various marker, chalk, or tack surfaces allow users to create a functional board designed to meet their needs. Coordinate color of cork, fabric, and vinyl with existing environment.

PART NO. H2-TS600124

* DIMENSIONS APPROXIMATE. CALL FOR DETAILS.

STANDARD BASE UNIT DESCRIPTION

- WEBSTER TS AS A FIXED BACK, CENTER PANEL
- REAR, IRREVERSIBLE SURFACE PANEL AT LEFT AND RIGHT OF WEBSTER TS

- CLEAR ANODIZED OR COLOR POWDER-COATED ALUMINUM TRIM
- MARKER, CHALK, OR TACK SURFACES FOR HORIZONTAL SLIDING PANELS
- LOCKABLE UNIT FOR FULL INTERACTIVE SURFACE SECURITY

SURFACE MATERIALS

MARKER AND CHALKBOARDS

P3 ceramicsteel™ surface is the most significant improvement in writing and erasing in 30 years. The durable surface is nonporous and erases easily, without “ghosting.”

QuartzVue™ is a proprietary ceramicsteel projection surface that incorporates a special metallic ceramic layer of enamel, making it the most durable projection surface in the world.

PolyVision warrants its QuartzVue and *P3 ceramicsteel* surfaces forever, repairing or replacing the surface covered, for as long as it is in use.

SURFACE OPTIONS

P3 ceramicsteel SURFACE – HIGH & LOW GLOSS MARKERBOARD

6100H, 6100L – WHITE

6101H, 6101L – LIGHT GREY

SURFACE FEATURES

P3 ceramicsteel SURFACE

- SMOOTHER WRITING
- INCREASED COLOR CONTRAST
- REDUCED SURFACE LIGHT DISTORTION
- ENHANCED VISIBILITY
- OPTIMUM EYE COMFORT
- IMPROVED ERASABILITY
- MAGNETIC
- RESISTANCE TO CHEMICALS, SCRATCHES, BACTERIA, FIRE, AND GRAFFITI

QUARTZVUE SURFACE

- LOW GLOSS FOR PART-TIME PROJECTION
- HIGH CONTRAST AND CLARITY
- CAN BE WRITTEN ON WITH STANDARD DRY ERASE MARKERS AND ERASED WITH A DAMP CLOTH

TACKBOARDS

PolyVision’s tackable surfaces allow instructors and educators to easily display illustrations and graphs. PolyVision offers cork, vinyl, and fabric surfaces.

Natural cork is composed of premium quality, pure grain natural cork.

Colored cork is composed of premium, linoleum-grade natural cork that is colored throughout.

Vinyls consist of a pliable, vinyl embossed surface, laminated to fiberboard or cork with a special adhesive.

Fabrics are 100% polyester 2-ply construction with a Class A flammability rating.
