

SmartMedia Touch Monitors SMA Series

the next generation in
presentation
technology

making the interactive experience extraordinary

SmartMedia Touch Monitor SMA series offers you the next generation in presentation technology by providing multi-touch functionality and the ability for four people to simultaneously write. All the monitors are FULL HD LED displays.

The modern design comes with frames in silver and titanium colors, rounded corners and additional connection ports for HDMI, USB input and USB touch on the front side of the monitor.

APPLICATIONS

Great for conference rooms, classrooms, advertising spaces, retail locations and corporate lobbies, it can be used as an interactive whiteboard or for interactive digital signage. Also with the professional software for interactive whiteboards supplied, these monitors are very popular in schools, training centers and meeting rooms.

FEATURES

- Anti-glare glass to reduce reflections
- Infrared Technology for fast, accurate and reliable touch
- Thin bezel design
- Unique frame design that allows for servicing the infrared modules onsite
- Free white-boarding software for annotating over applications
- Optional integrated PC, your choice of i3 or i5 processor

Included SmartMedia SmartTouch software

SmartTouch is the software that lets you manage multimedia content and presentation files more effectively and in a more visually engaging way on any touch-based device. Easy to use, SmartTouch allows you to control and interact with content naturally thanks to hand gesture recognition. SmartTouch has been designed to give you an experience much like your smartphone or tablet. Designed for use with touch screen monitors and with interactive kiosks and tables.

Great at info points, trade shows, museums, retail locations, shopping malls, television news studios, meeting rooms, airports, hotels, universities, schools, training centers, libraries, etc.

PHOTO, VIDEO AND AUDIO VIEWER

Allows you to visualize and manipulate photographs, videos and audio files, annotate directly over the screen, and capture and email your annotations.

BROWSER

The integrated web browser will let you navigate the Internet and create white and black lists to limit access only to specified sites, annotate directly over the screen, and capture and email your annotations.

JIGSAW PUZZLE

This app simulates a classic jigsaw puzzle to entertain in a fun way! Users can turn any image they desire into a puzzle.

PDF AND MICROSOFT WORD, EXCEL AND POWER POINT FILE VIEWER

Lets you visualize the selected file and zoom in or out on all or part of the document, annotate directly over the screen, and capture and email your annotations.

QUIZ BUILDER

Create and manage custom quizzes for educational or entertainment purposes.

FORM:

Lets you visualize the selected file and zoom in or out on all or part of the document, annotate directly over the screen, and capture and email your annotations.

Included SmartMedia Pro and SmartMedia IWB software

SmartMedia Pro (for 5 users)

With SmartMedia Pro, our multimedia-linguistics educational network software, you can easily transfer and share images or files with your students, communicate with them through voice and text messages, explain with the help of images and sounds, broadcast a movie via network, show the class an exercise created by a student, check the student's screens, block student's devices, manage instant quiz/survey and more. SmartMedia Pro is simple to learn, simple to use and doesn't need a technical person to operate or maintain.

Compatible with:    

More than 17 languages:

SmartMedia IWB

Main features:

- Check all functions of your PC or Laptop and applications
- Draw perfect geometric shapes
- Save and print what has been done with the whiteboard
- Write on the applications, create annotations and highlight or enlarge parts of the screen
- Instant connectivity in real-time to camera, webcam, document camera or other digital devices
- Annotate over videos
- Distance learning: connection in video conference mode via Internet or LAN and/or wireless, allows participants with the same software to join the conference and share whiteboards
- Integration with the main video conferencing systems
- IWB format supported, common file format (CFF) for interactive whiteboards
- Compatible with the most popular operating systems
- Multi-user with interface customization of the software and password protection for single user
- Research of online resources through a keyword
- Exportation in: image (.jpg, .jpeg, .bmp, .png, .tif, .tiff, .gif), pdf, power point (.ppt, .pptx), word (.doc, .docx), excel (.xls, .xlsx), web page (.html)
- and much more.
